Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Response to Arguments

Allowable Subject Matter

5. Claims 1-9 are allowed.

6. The following is an examiner's statement of reasons for allowance:

The closest prior art in the field does not teach the features of the independent claims of representing an integral number that is an element of a group having a group identity element, as a binary vector, initializing the result to that of a group identity element, and selecting in sequence a predetermined number of successive of bits of said vector, where for each of the bits selected there is performed a group operation on the result to derive a first value, and subsequently utilizing this intermediate value or the originally selected element in successive group operations depending on the state of the processor carrying out the group operations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
